

Self-graded Assignment 1 Checklist

Student Name: Justin Yu

Student Set: 1D

Criteria

=====

- [x] A home page links to signup and login, if not logged in; and links to members and signout, if logged in.
- [x] A members page that displays 1 of 3 random images stored on the server.
- [x] The members page will redirect to the home page if no valid session is found.
- [x] The signout buttons end the session.
- [x] All secrets, encryption keys, database passwords are stored in a .env file.
- [x] The .env file is NOT in your git repo.
- [x] Password is BCrypted in the MongoDB database.
- [x] Your site is hosted in a hosting service like Qoddi.
- [x] A 404 page that "catches" all invalid page hits and that sets the status code to 404.
- [x] Session information is stored in an encrypted MongoDB session database. Sessions expire after 1 hour.

50 /50 (Total grade out of 50, 5 marks each x 10 items)

*Note items are considered *fully* complete (marked with an x inside the box: [x]), OR incomplete

(box is left empty: [])
